PROJECTS

- **DairyEase**
  January2025-April2025
  github.com/Yashh2002/DairyEase
  Tools: Python, Django, HTML, CSS, JavaScript, SQLite, VS Code
    - Designed and developed a visually compelling website, incorporating third-party libraries for added functionality.
    - Implemented smooth scrolling and micro-interactions to enhance user experience.
    - Ensured full responsiveness, achieving a 98% cross-device compatibility rate in testing.

- **WasteBucks: Mobile app**
  November 2024
  github.com/Yashh2002/WasteBucks
  Tools: Android, Java/Kotlin, Firebase, MySQL, Android Studio
    - Built a mobile app using Android (Java/Kotlin) to streamline local waste management and incentivize responsible disposal.
    - Integrated Firebase and MySQL for real-time data storage, authentication, and seamless backend communication.
    - Designed intuitive user flows for scheduling pickups, tracking waste contributions, and redeeming rewards.

- **SupremeBasket: Webapp**
  January 2024-April 2024
  github.com/Yashh2002/SupremeBasket
  Tools: Java, JSP, HTML, CSS, JavaScript, MySQL, Eclipse
    - Created an e-commerce platform featuring a comprehensive catalog of groceries and household products.
    - Integrated secure payment gateways and essential third-party APIs to streamline transactions and enhance performance.
    - Designed and implemented a responsive, user-friendly UI for seamless product browsing and smooth checkout experiences across all devices.
